Nichecom Calibration and Repair Services

Nichecom have been providing calibration and repair services to Loop Technologies (formerly RGL) for ten years and during this time we have enjoyed exemplary service from Paul Eayrs and his team.

We operate a large ISO9001 certified facility in Hamilton specialising in telecommunications equipment repair and servicing for both manufacturers and operators in New Zealand and overseas. All instruments we use for final test must be calibrated and Nichecom are always responsive to our needs for short turnaround time for some critical pieces of equipment.

We have 100% confidence in Nichecom's technical and service capabilities and I have no hesitation in recommending them.

I would be willing to provide a verbal reference if required.

Yours faithfully
